# Coffee

## Robusta Coffee

Robusta is a type of coffee plant with the scientific name *Coffea Canephora*. As the name implies, the drink extracted from robusta coffee beans has a strong taste and tends to be more bitter than arabica. Robusta coffee beans are widely used as raw material for instant coffee and blended coffee to increase the strength of the coffee taste.

## Aceh Gayo Coffee

Aceh is also known as one of the largest Arabica coffee production centers not only in Indonesia, but also in Asia with its good coffee quality at the world level. His coffee is better known as "Gayo" coffee because of the characteristic aroma and taste of the coffee. Gayo coffee is an arabica coffee variety which is one of the leading commodities originating from the Gayo Highlands, Central Aceh, Indonesia. Gayo coffee has strong character, low acidity with a hint of spice.

## Arabica Coffee

Arabica coffee is one of the various types of coffee that is cultivated globally. Compared to various other types of coffee, Arabica coffee is one of the coffees that has the highest value in the world. This is due to the different flavors produced by each variety, so coffee lover have many flavors to choose from.

### Specification:

- Altitude : 1200-1600 MASL
- Moist : 10-13 %
- Defect : 3-5 %

# Honey

## Mellifera Honey

Mellifera honey comes from the *Apis mellifera* honey bee which is the most superior cultivated bee. Honey produced from this type of bee can actually reach 60 kg/colony/year if the bee-feeding plants are adequate and the colony management is carried out properly.

## Trigona Itama Honey

Trigona Itama honey is a type of honey produced by a stingless bee, namely the Trigona Itama bee. Stingless bees are one of the most common types of honey-producing bees. Trigona honey color is darker because of the higher concentration of antioxidants in it.

# Semi Husked Coconut

We offer rich, juicy and natural fresh coconut. It is supplied as fresh coconut with/without skin as required. It is classified as a "functional food" because it provides many health benefits beyond its nutritional content. Furthermore, this Chocolate Coconut is used for culinary purposes and for the extraction of coconut milk and oil etc.

## Spesification:

- Style : Semihusked
- Moisture : Up to 20%
- Impurity : Max 3%
- Length : 10-30 cm

\*MOQ 1 Container 20 ft

hello@themangats.com

+62 85156519923

# Dessicated Coconut

Dessicated coconut (DC) is the result of processing coconut that is mashed by chopping or grating it without adding other ingredients and then drying it hygienically. The nutritional value of DC is quite high and resembles coconut in general. Starting from the fat content, protein fiber, vitamins and minerals can also be obtained from DC.

## Spesification:

- DCLF (lowfat)
- Total fat  $50\pm 5$
- Fine
- Extra fine
- DCHF (Highfat)
- Total fat  $65\pm 5$
- Fine medium

**\*MOQ 1 Container 20 ft**

hello@themangats.com

+62 85156519923

# Palm Sugar

Palm sugar is a sweetener derived from any variety of palm tree. Palm sugar is sometimes qualified by the type of palm, as in coconut palm sugar. While sugars from different palms may have slightly different compositions, all are processed similarly and can be used interchangeably.

**Spesification:**

- 100% pure palm sugar
- Mesh : 12-18
- Pakaging 25kg

**\*MOQ 1 Container 20 ft**

[hello@themangats.com](mailto:hello@themangats.com)

+62 85156519923

# Virgin Coconut Oil

Virgin coconut oil (VCO) is made from extracted fresh coconut meat. The results or extracts that produce natural oil called virgin coconut oil or virgin coconut oil. Called 'virgin' or 'extra virgin' because in the manufacturing process it is still natural and contains good fatty acids (fatty acids) that are beneficial to the body.

## Specification:

-Packaging jerry can 50 kg or custom size

\*MOQ 1 Container 20 ft

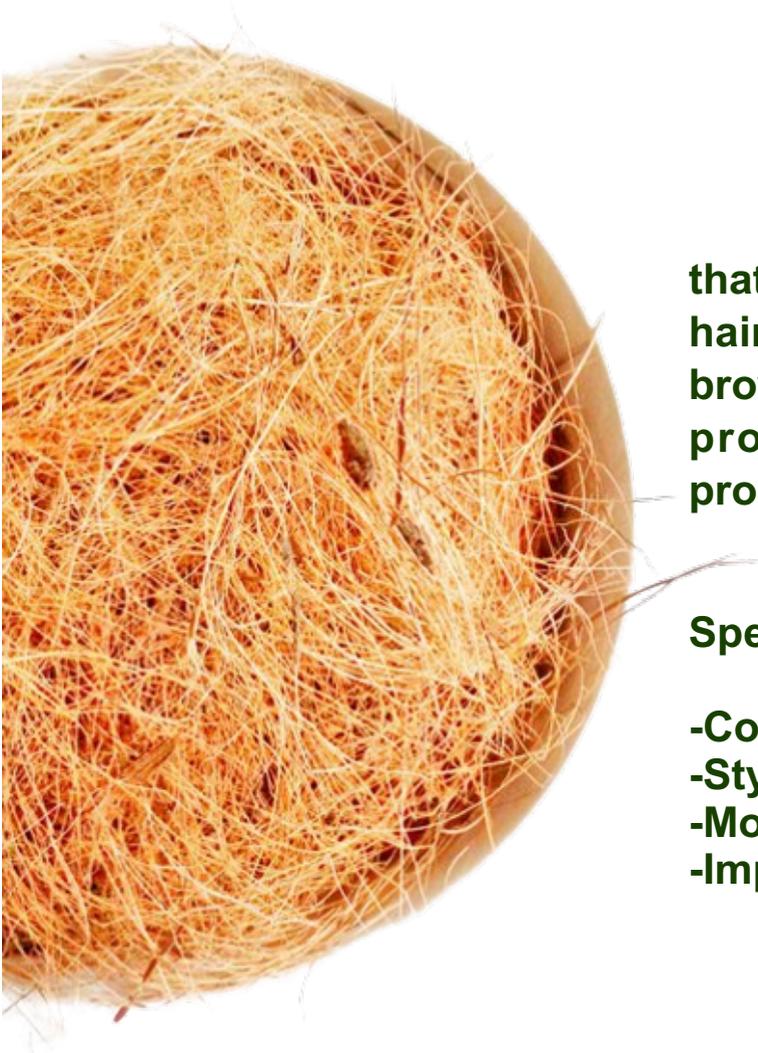

hello@themangats.com

# Coco Peat

Cocopeat is a planting medium that has a fairly high water absorption capacity and can store more water than is accommodated in the soil. Because it is made from organic materials, Cocopeat is very environmentally friendly and can be degraded in the soil well when it is not used.

## Specification:

### #Cocopeat High EC :

- Size 30 x 30 x 12 cm
- Wight 5 kg
- EC > 0.5 ms/cm
- pH 5.0 – 7.0
- Moisture < 30%
- Short fiber content < 10%

### #Cocopeat Low EC :

- Size 30 x 30 x 12 cm
- Weight 5 kg
- EC < 0.5 ms/cm
- pH 5.0 – 7.0
- Moisture < 30%
- Short fiber content < 10%

\*MOQ 1 Container 20 ft

hello@themangats.com

+62 85156519923

# Gayo Avocado

Gayo avocado comes from the city of Gayo in Aceh. It has a soft flesh texture but the water content is not too high. The flesh of the fruit is thick and not fibrous and has a distinctive taste and aroma.

## Specification:

- Colour : Green skin, yellow flesh
- Type : whole
- Value : Rich Vitamin
- Weight : 200-300 gr/pcs
- Packaging details : 5 kg/carton or are customer request
- Taste : Naturally Sweet

**\*MOQ 1 Ton**
